(54) DRIVING ATTITUDE ADJUSTER OF VEHICLE

(57)Abstract:

PURPOSE: To perform an attitude adjustment to take a proper driving attitude by a driver easily irrespective of the driver's physical measurements by means of a positional adjustment between a driver seat and each of operating pedals such as an accelerator pedal, a brake pedal or the like.

CONSTITUTION: Four operating parts 71 to 74, a control unit and a motor driving control part 70 including a read-only memory stored with adjusting data pertaining to each position of a seat, where an eye point of an occupant standard model taken on a driver seat 14 is placed on a proper position while this standard model takes a position equivalent to the proper driving attitude and the operating parts are all installed in a seat movable, supporting mechanism part 20, an accelerator pedal movable supporting mechanism part 24 and a brake movable supporting mechanism part 27, respectively. With this constitution, according to each operation of these operating parts 71 to 74, control in accordance with the adjusting data stored in the read-only memory concerning these movable supporting mechanism parts 20, 24 and 27, is carried out by the motor driving control part 70.
